PROFESSIONAL SUMMARY

- Workday HCM Analyst with 4+ years of experience implementing, configuring, and supporting Workday HCM across mid-to-large U.S. enterprises, with hands-on expertise in Core HCM, Recruiting, Onboarding, Absence, Time Tracking, Compensation, Benefits, and Talent & Performance modules.
- Deep functional knowledge of Business Process Framework (BPF) configuration including condition rules, validation rules, sub-business processes, and approval chains; combined with end-to-end tenant administration covering org setup, position management, job catalog, and RBAC security roles.
- Hands-on integration and data migration experience using EIB (Inbound/Outbound), Core Connectors, and Workday Studio to support accurate data movement between Workday and platforms such as ADP, Boomi, and SFTP-based carrier systems.
- Strong Workday reporting and analytics skills delivering Advanced Reports, Composite Reports, and Prism Analytics dashboards with calculated fields to surface HR KPIs, DEIB metrics, headcount trends, and talent insights for leadership decision-making.
- Experienced in compliance-focused environments supporting SOX, HIPAA, FLSA, and GDPR requirements; active contributor to semi-annual Workday release cycles through UAT, regression testing, and change impact analysis with zero critical post-deployment defects.
- Workday Pro certified (HCM and Recruiting); effective cross-functional collaborator with HR Operations, Payroll, Finance, Legal, and IT teams, skilled at translating complex HR policy requirements into scalable, audit-ready Workday configurations.

TECHNICAL SKILLS

Workday Functional Modules: HCM Core, Recruiting (iRecruit), Onboarding, Absence Management, Time Tracking, Talent & Performance, Benefits Administration, Compensation Management.

Workday Configuration & Admin: Business Process Framework (BPF), Condition Rules, Validation Rules, Organization Setup (Supervisory, Cost Center, Matrix), Job Catalog, Position Management, Security Role Administration.

Reporting & Analytics: Workday Advanced Reports, Composite Reports, Calculated Fields, Prism Analytics, BIRT, Workday Adaptive Planning (WFP), Worksheets.

Integrations & Data Tools: EIB (Inbound/Outbound), Core Connectors, Workday Studio, REST/SOAP APIs, Boomi, MuleSoft (basic), SFTP.

Testing & Release Management: UAT, Regression Testing, Workday Release Readiness, Change Impact Analysis, SOP Documentation, JIRA, ServiceNow.

BI & Data Tools: SQL, Power BI, Tableau, Excel (Power Query, PivotTables, Macros), Google Looker Studio.

PROFESSIONAL EXPERIENCE

Workday HCM Analyst
Accenture - New York, USA

Feb 2024– Present

- Configured and maintained Workday HCM tenant across core modules including Recruiting, Onboarding, Absence, Time Tracking, and Talent & Performance, supporting over 18,000 employees globally and reducing HR admin processing time by 30%.
- Redesigned business process frameworks for hire, termination, job change, and leave workflows using condition rules and sub-business processes, cutting manual approval exceptions by 42% within the first two quarters.
- Led end-to-end Workday Recruiting configuration including job requisition templates, offer letter templates, assessment integrations, and agency management, improving time-to-hire metrics by 25%.
- Built and maintained 30+ Advanced and Composite Reports with calculated fields for HR Operations, Talent, and DEIB teams, enabling real-time visibility into headcount, open positions, and hiring funnel KPIs.
- Managed EIB inbound/outbound loads for mass data updates including position updates, compensation changes, and benefits data, reducing load error rates to under 2% through pre-load validation scripting.
- Partnered with IT and benefits vendors to configure and monitor Core Connector integrations, resolving file transmission errors proactively and ensuring 99.5% on-time data delivery to carrier platforms.
- Drove UAT and regression testing cycles for two major Workday releases per year, documenting test scripts in JIRA and achieving zero critical defects post-deployment across HCM and Absence modules.

- Supported Workday Prism Analytics dashboards for Workforce Planning, surfacing attrition risk and internal mobility trends leveraged by HR Business Partners in quarterly talent reviews.
- Conducted bi-annual security role audits to identify and remediate access conflicts, maintaining compliance with SOX and HIPAA data governance requirements across HR and Payroll domains.

Workday HCM Functional Analyst Luminaire Technologies- Hyd, India

Nov 2020 – Dec 2022

- Supported Workday HCM implementation for a U.S.-based retail client (30,000+ employees), configuring core HCM, Benefits, and Compensation modules during full deployment lifecycle from design to go-live.
- Translated HR policy requirements into Workday business process configurations and condition rules, reducing post-go-live configuration change requests by 35% through thorough requirements documentation.
- Created and maintained Workday calculated fields and Advanced Reports to support benefits enrollment analysis, compensation banding audits, and headcount reconciliation for the client's HR Operations team.
- Executed EIB data migration for historical worker records, job profiles, and compensation data — validating 50,000+ records with less than 0.5% error rate during the parallel run phase.
- Collaborated with integration teams to configure and test Core Connector payroll integrations with ADP Workforce Now, supporting accurate payroll data feeds post go-live with zero critical reconciliation gaps.
- Participated in sprint-based UAT cycles aligned with Workday's semi-annual release schedule, authoring test scripts and coordinating sign-off with HR and Payroll business owners.
- Delivered end-user training and created SOPs for HR system administrators covering business process workflows, security role assignments, and report scheduling in Workday.

KEY PROJECTS

Workday Recruiting & Onboarding Optimization

- Redesigned end-to-end Recruiting and Onboarding business processes in Workday to align with revised TA workflows, reducing time-to-complete-onboarding from 5 days to under 2 days.
- Configured dynamic offer letter templates with conditional logic across 12 employee types, eliminating manual offer document generation and saving the TA team 15+ hours per week.
- Integrated Workday Recruiting with a third-party background screening vendor via Core Connector, automating candidate status updates and removing a previously manual coordination bottleneck.

Absence & Time Tracking Modernization

- Configured complex Absence Plans across multiple accrual types (PTO, Sick, FMLA) aligned to state-level compliance requirements.
- Designed Time Tracking worklets and period schedules for hourly and salaried workforce segments, reducing timesheet correction volumes by 28% in the first payroll cycle post go-live.
- Built reporting dashboards in Workday to track absence utilization, FMLA leave patterns, and overtime trends, giving HR managers timely visibility without reliance on manual extracts.

EDUCATION

Master of Science in Information Systems Wilmington University

Jan 2023-May 2024

Bachelor of Technology in Computer Science PSCMR College

June 2016-Oct 2020
